ColourFactory Hair Colour: a revolution in hair colouring!

ColourNation is proud to be the very first salon in London, offering this revolutionary hair colouring technology. ColourFactory can produce two hundred and seventy unique hair colours, with millions of variations, to ensure you get the colour you deserve. ->Want exactly the same colour next time? ->Want multi-dimensional, lifelike, highlights? ->Like the colour last time but want a bit lighter this time? ...No problem!

You'll be amazed at the results we can produce for you... EVERYTIME! Call us now for your FREE consultation on 0207 836 8883. Why is ColourFactory Hair Colour Better? ColourFactory hair colours have been specially selected for their:- **->extensive durability ->convincing colour shine ->outstanding coverage power (no unwanted colour variations) ->best possible care effects ->minimum use of ammonia (kinder on your hair) ->...and no animal testing.** With 270 colours and millions of variations at our finger tips we can instantly create unique colours which will better compliment your skin tones and natural colouring. Most salons will stock only a core selection of 50 or so tubes of hair colour and will mix anything a bit different in a bowl. This sounds ok but:- **->Ever wondered why those colour sample books are so glossy? Is it to hide the lack of colour samples? 50 tubes doesn't give that many choices. -> Why does your stylist give you the same colour everytime? When you've told him it's a bit light for you? ->Ever noticed other women with the same colour hair as you? Your**

stylist couldn't be using his favourite colour on everyone surely? ->**Colour potency deteriorates over time and in contact with air** especially when caps are left off colour tubes. (ColourFactory colours come in vacuum sealed cartridges, keeping them fresh and potent and therefore your hair colours more vibrant and longer lasting). -> **Ever wondered why your colour seems a bit different than last time?** Mixing hair colour by hand requires skill and time. When a salon is busy mistakes can happen. ->**Ever noticed part of your hair looks lighter/darker than the rest?** Did your stylist run out of colour and have to mix more? ColourFactory allows us to mix as much as we need and then more if needed in EXACTLY the same shade again and again. ->Like the colour you had last time? **Can your salon make it EXACTLY the same again?** Is your stylist scratching his head trying to remember what mix they did for you? Our stylist record your colour as a ColourFactory formula so that any ColourNation stylist can recreate the same colour for you next time. ->Want it a little darker than last time? **Can your salon a) make that EXACT colour again and b) make it a shade darker?** It'll actually be their best guess with a lot of luck mixed in. At ColourNation we can easily take your last colour, one, two, three, five or more steps lighter or darker in seconds. ->**Want multi-dimensional, life like, highlights?** Your stylist will need to mix that perfect shade for you then try to mix a shade darker/lighter. But can they do it for you again? ColourFactory stylists can do it in seconds. **...is it time to reconsider where you get your hair coloured? Call us on 0207 836 8883 for your free consultation. Introducing the Professionals** ColourNation Professional Stylists are all trained to an advanced level in hair colouring. They have the At ColourNation we do

A LOT

of colour. We've seen pretty much every request now (although who knows what tomorrow will bring). We've built a Finally at ColourNation we pride ourselves on being friendly, approachable and unpretentious. Many customers if this is your first time you should have a patch test see below). It can be a scary process but we're here to walk you just check our forums), we all had to ask once. ;-)

Main types of hair colour There are several types of hair colour available:-

-> **Highlights - Full Head** All over highlights using foils and our state of the art ColourFactory technology. A full Head of highlights will give you an amazing natural multi-dimensional look. We'll also (unlike other salons) use more than one colour to achieve this look - with ColourFactory we can easily mix shades lighter and darker to give you a real three dimensional natural look. You'll absolutely love it. -> **Highlights Half Head**; Half the amount of foils used for a full head of highlights. This will still give you the multi-dimensional look and again we'll use tones to blend your highlights. -> **Highlights T-bar** - Also known as a ¼ head where the central parting and front fringe colour is refreshed and highlighted (imagine a T shape when seen from above). This is great if your roots are starting to show or you just want to refresh your look - everyone will think you just had another full head when really you just refreshed your colour. -> **Floodlighting (1 foil)**; one foil highlight added for dramatic effect - it's a great way to try out highlights to see if you like the idea. Highlights start here! -> **Flying Colours**; Freehand colour that is painted onto random pieces of hair suitable for shorter hair styles. This may also be known as a shoe shine and will normally last until the next cut. Again a great way to try out colour to see if it's for you. -> **Tint** - An all over permanent colour that lasts between 6-10 weeks. (Pssst, use this to cover gray hair.) -> **Re-growth** - Colouring of roots after having a permanent tint to refresh the look. -> **Semi-Tint** - a semi permanent tint which will wash out after 8-10 washes - if you're scared of colour try this to see if you like it. -> **Toner / Colour Balancing** - sometimes the hair colours can need a little finesse to blend naturally into your existing hair colour - toner / colour balancing is our magic in these cases. -> **Bleach** - if you want very light coloured hair we can bleach your hair. -> **Colour Correction / Change**; changing colours or correcting a previous salon's colours (or home colour attempt) can be time consuming and requires a great deal of skill.

Results cannot be guaranteed because we won't always know exactly what has been used before. That said we can normally fix hair disasters. ->**Combinations** - Sometimes a combination of colour techniques may be needed to achieve your desired look. Highlights and a toner/ Colour Balancing, a bleach before trying a lighter colour on darker hair or a tint before highlights. What ever you and your stylist choose rest assured that you're in very safe hands :-)
Call us on 0207 836 8883 for your free no obligation consultation. **Strand Test** A [strand test](#) ensures you know exactly how **your colour** will look on **your hair**. It's available at £4/strand and you can [read more here](#). Patch Test Hair colouring is a very safe process today but some people may have an allergic reaction, if you have any concerns, **we recommend a Patch tests which are available FREE of charge** please lets us know when booking. A patch test is simply a little hair colour applied behind the ear (where skin is more sensitive) to test if there is any reaction. You must book in for a patch test **at least 48 hours before you colour service** so that any allergy has time to surface.
