Nanomax Hair Repair

Nanomax Hair Repair: Is your hair badly damaged from straightening, colouring or bleaching? Nanomax has been withdrawn from the UK market when it's distributor ceased trading earlier in 2012. We believe this was because of the amazing results being achieved by what were called Brazilian Straightening Systems. We've been using the systems from GK Hair (formerly Global Keratin) since they first launched in the UK. GK Hair have just (June 2012) released a new system called 'The Best' which we believe is [the best hair treatment on the market](#), read more [here](#). 'The Best' will defrizz and improve the condition of hair without straightening! It also allows you to wash your hair immediately after treatment which is a major step forward on previous systems.

Using particles so small that they can penetrate the hair shaft, **NANOMAX** replaces the vital components of the hair structure to restore its health, vitality, strength and shine. Five treatments are available in two types. ->Three Hair Repairers, Intensive, Repair and Hydrate.

->Two Hair Enhancers, ColourLock and 3D Shine ... ask us for details. Available now at ColourNation London **You need NANOMAX – a revolution in Hair Repair!** Have you let your hair down by straightening everyday, over blow-drying or constantly colouring – is it weak and stretchy, dry and frizzy or just completely out of control? Does it lack shine, vitality and lustre? Don't despair - a new radical hair treatment is available at a salon very near you……… NANOMAX™ is a professional, prescriptive and revolutionary range of hair damage repair treatments and specialist–hair enhancing– treatments that answer all your hair care worries! The range uses nanomolecular technology to turn back time and restore your hair to its former glory! Using particles so small that they can penetrate the hair shaft, NANOMAX™ replaces the vital components of the hair structure to restore its health, vitality, strength and shine.

The NANOMAX™ Hair Treatments range incorporates the following services:- Permanent Hair Damage Repair Services

There are three variants of Permanent Hair Damage Repair treatments depending on the level and type of damage. All of them –inject– biochemically engineered protein into the structure of the hair to repair and restore the hair–s natural health, flexibility, strength and shine. The three products can be used in combination as part of a 3 treatment course, to achieve the best possible results. **NANOMAX™ repair** – works on the cuticle or outer layers of the hair. Suitable for heat-damaged hair (especially by straighteners), to reverse normal everyday wear and tear, and also for chemically-treated hair in good condition. **NANOMAX™ intensive** – a more concentrated product

that works on the cuticle and the inner hair structure, the cortex. Suitable for more serious damage caused by colour, bleach and other chemicals, as well as very weak natural hair. **NANOMAX**; hydrate inserts moisture-capturing proteins into the inner hair structure, making it more manageable. Suitable for naturally dry, frizzy or dehydrated hair. Hydrate is suitable to be used as part of a NANOMAX treatment course on all damaged hair or as a course of three treatments on its own.

NEW Services

In addition to the Permanent Hair Damage Repair services, NANOMAX; has utilised nanomolecular technology to create two brand new services available in the salon; **NANOMAX; colourlock**; seals, and protects all coloured hair after a colour service to help prevent colour fade by up to an amazing 49%! Also adds a gorgeous shine.

NANOMAX; 3D shine; a revolutionary shine treatment for all hair types and textures that gives an instant, deep intense shine that smoothes and at the same time helps prevent frizz with its anti-humidity ingredients. **The NANOMAX;** processes The luxury Permanent Hair Damage Repair treatments take up to an hour in a professional salon and are all 3 phase services. PHASE 1; A deep cleansing shampoo with NANOMAX; Pre-treatment Cleanser. This ensures that the hair is clean and pH balanced yet detangled and easy to comb. Hair is then blow dried fully ensuring that there is lift at the roots and that excess moisture has gone from the surface of the hair. PHASE 2; The revolutionary NANOMAX; Microsystem activates the solutions, which creates a fine mist of protein nanomolecules. This mist is applied section-by-section to your hair, to insert the tiny particles into the damaged areas of the hair structure. Excess moisture is evaporated by a low heat with either a blow dryer or temperature-controlled straighteners/curling irons. PHASE 3; The lock-in stage. This phase is carried out in the same way as the first, but using the NANOMAX; sealing mist; to lock the nanomolecules into the hair and ensure incredible shine. **SMALL IS BEAUTIFUL**

In the quest for hair and beauty perfection, billions of dollars are being spent on painstaking research and meticulous development into a new and exciting branch of science - nanotechnology. Nanotechnology works with particles less than 100,000th of the width of a human hair, or at an atomic level. To give you an idea of size, a metre is 1000 millimetres and each millimetre is made up of 1 million nanometres! To the right is a highly magnified grain of sand with a hole drilled through it. The hole is 30,000 nanometres wide and you could fit billions of nanomolecular particles into it! When it comes to hair and beauty, products in nanomolecular-size particles can be much more effective than ordinary products and can guarantee the most successful and beautiful results.

YOUR HAIR STRUCTURE Hairdressers will tell you that hair is made from the combination of a complex natural protein called keratin, and moisture. In normal healthy hair, keratin accounts for about 90% of the structure and moisture the remaining 10%. Keratin is principally responsible for the hair's strength and resistance to general wear, while moisture is mostly responsible for its elasticity, flexibility, softness and manageability. The correct balance of protein and moisture is essential for healthy, shiny hair. Unfortunately, hair keratin is damaged and moisture can be depleted by straighteners, colours, perms, blow-drying, the sun, pollution, pool chemicals and even everyday wear and tear, like brushing. The damage can make the hair feel coarse, look out of condition and become difficult to manage and style. Under an electron microscope this damage can be recognised in the form of cracks, splits and craters in the hair, as can be seen in this highly magnified hair strand.

ADVANCED CARE Now, from the company that brought you TANAGRA, the world's first permanent hair repair service, comes the latest scientific breakthrough in professional hair care - NANOMAX. NANOMAX is a professional, prescriptive range of hair damage repair treatments and specialist 'hair enhancing' treatments. The unique TCQ nanomolecular ionic technology used in our biochemically engineered formulations ensure beautiful effects on all hair types and textures. Unlike ordinary cream or liquid treatments, NANOMAX treatments have to be turned into a mist by a specially designed electronic Microsystem and then applied to the hair with special ceramic brushes. This incredibly fine and powerful penetrating mist infuses tiny nanomolecules (particles so small you could fit millions on to a pin-head!) into the hair structure to heal, repair, strengthen, protect and shine. So, now your hair can be just how nature intended beautifully soft, shiny and healthy! **The**

Results

After just one treatment with NANOMAX; you will notice the difference compared to other conditioning treatments;. The hair feels lighter, softer and more flexible with no additional product required. After three treatments you will have fully restored and repaired hair that is strong, flexible and more manageable. NANOMAX; Permanent Hair Damage Repair is a specialist course of three treatments using either repair, intensive or hydrate and carried out within a professional hairdressing salon. The NANOMAX; Hair Enhancing treatments, colourlock and 3D shine, take around 30 minutes in a professional salon and are both single phase services. NANOMAX; launches this month and now you can be one of the first to benefit from its unique repairing properties at ColourNation, one of the leading salons in London. NANOMAX; Hair Experts will diagnose your hair and then prescribe the best treatment for you. **To book your NANOMAX; consultation, please call 0845 88 88 333.**
